Dear Valued Actian Customer,

Information security is of utmost priority to Actian. A new vulnerability dated March 31st 2022, [CVE-2022-22965](#) (Spring4Shell) identified a vulnerability in a Spring MVC or Spring WebFlux application running on JDK 9+ that allows remote code execution via data binding. The specific exploit requires the application to run on Tomcat as a WAR deployment. If the application is deployed as a Spring Boot executable jar, i.e. the default, it is not vulnerable to the exploit. However, the nature of the vulnerability is more general, and there may be other ways to exploit it.

Actian has given this vulnerability a low-risk rating.

No Actian products are affected by this vulnerability.

If you have any questions, please contact [Actian Support](#).

Thank you,

Pamela Fowler (she/her)
